

WEBMASTER'S REPORT TO REGION 9 ASSEMBLY 2021

I'd like to say that it's been an honour that you trusted me to be the webmaster of Region 9. In the few months that I've been in service I did the following:

- 1) Creating and editing mail accounts. Mostly changing passwords and applying forwardings to mails I was appointed.
- 2) I have cleared junk files from the website (up to 40GBs). I've set the website to make a daily backup and send it to the Drive of the webmaster's email. So in case something goes wrong the site can be recovered. Anyone who has basic knowledge of wordpress, can find it easily in the UPDDRAFT plugin that I've installed on the website.
- 3) I managed the mailing lists (adding and removing mail addresses). Furthermore I have created an additional mailing list when needed.
- 4) I started creating a new website with a new design, but unfortunately I didn't have the time to complete it. The demo site can be found at demo.oaregion9.org
- 5) I've contacted the registrant of the domain (Kumbit) many times in order to secure the website with the HTTPS protocol and update the details of OAREGION9.ORG (unfortunately these two did not complete). I hope someone can make it happen in the future.

Yours in service,

Panagiottis

Former R9 Webmaster
